The 5th International School Social Work Conference was hosted by the School Social Work Association of Ghana “ which is a national membership organization that connects, informs and mobilizes professional social workers practicing in the educational systems of Ghana. The decision to form the association came as a result of the need to bring together professional social workers practicing in various social work positions within the Ghana Educational Service (i.e., Welfare, Special Education, Guidance and Counseling and School Health Education). The purpose is to network and exchange ideas and information about best practices in the field. The Association has gone through a process of development since 30th March 2001, when the first meeting was organized with only 10 members. Currently, SSWAG works with more than 200 members, many of them providing services to basic and high school students, families, teachers, and educational administrators. School social work is a strong and growing field in many districts.”
